The latest in the continuing series of "Blue Sky" Advanced Technology Forums sponsored by the Department of Energy's Office of Emergency Management and Office of Information Management will be held on Wednesday, January 26, 2000 from 12:00 - 1:00 p.m. We have made arrangements for you to attend this presentation.

The topic will be: Satisfying New Congressionally Mandated Stewardship Obligations Through Convenient Software  
Presented by: Larry Shoup, Janus Technologies

The citizens of the United States provide financial resources and assets to the Federal government. The executive and legislative branches of government are responsible for the stewardship of these resources. There have been various initiatives over time to improve this stewardship. They include the Joint Financial Management Improvement Program (JFMIP), President's Council on Management Improvement (PCMI), Chief Financial Officers (CFO) Act of 1990, Government Management Reform Act (GRMA) of 1994, and Federal Financial Management Improvement Act (FFMIA) of 1996. This presentation shows how government agencies can use a software system to begin meeting their stewardship requirements.

Join us in the Forrestal Building, 1000 Independence Avenue, Room 1E-245 and bring a lunch if you wish. The Forum is strictly informal and relaxed. For those coming from outside DOE, please plan to arrive at the Forrestal Building and obtain a visitor's pass and further directions to the Forum at the VIP sign-in desk.

If you wish to receive a copy of the presentation that Larry is giving, please contact me with a return e-mail stating your name, address, phone and e-mail.
